# 897	Name: <b>Crazy Mountain Complex</b>		Cause: <b>Lightning</b>	Admin: <b>NOD</b>
Narrative: Competition between priority incidents kept resources in high demand and in short supply. Extreme drought codes and prolonged temperatures above seasonal norms continue to be a problem. Widespread dense smoke conditions prevented aerial support and limited helicopter capabilities, hampered forward scouting, ability to track perimeter growth and contributed the public health concern. Access to the town of Circle via the Steese Highway has fire on both sides of the road and there are temporary travel restrictions between MP 147 and 161. Engines will escort vehicles when fire behavior dictates. Line was cut and prepped at Steese Highway MP 159, east to the ridge in preparation for burn out. West of MP 159 line was scouted in preparation of indirect line to fire's edge at Birch Creek. Some burnout near the Birch Creek Bridge, MP 147, towards the east was completed to secure line along the road corridor. Burnout will continue as conditions permit this evening. Crews made good progress continuing with mop up and securing line in the 12 Mile Bluff area on the Little Black Fire. Aerial resources were again grounded due to limited visibility the entire day. Jagged Ridge Fire demonstrated significant movement to the west to Birch Creek.

Firefighters were deployed to reduce fuels near a structure on the Alaska Pipeline. The smokejumper's burnout was described as backing as planned. 8UP was only able to map the south side of the fire due to low visibility on the northern perimeter, while the southwestern perimeter is still a 0.5 miles from a rock quarry. The fire's column was capping off at 5000 feet altitude. (+500)

Narrative: At 1800, 1010F reported extreme fire behavior all along the northwest flank with the fire making a major run toward the North Fork of the Kuskokwim River. 1010F was unable to fly a significant portion of the perimeter - including the whole north side - due to smoke. The smoke column is clearly visible from the ground at the Village of Nikolai, which is 25 miles away, & visible from the air for over 50 miles. The fire was also active in some areas along the east flank. Additional acreage will be reported once visibility improves to where the perimeter can be mapped.
